

NARENDRA KUMAR JHA

Unity Game Developer | Multiplayer, Gameplay Systems & Web3 Integration

jhavicky25@gmail.com • +919354016480 • New Delhi, India • [Portfolio](#) • [LinkedIn](#) • [GitHub](#)

SUMMARY

Unity developer with 4 years shipping multiplayer, mobile, and blockchain-integrated games across Android, WebGL, and PC. Owns gameplay architecture end to end, combat, AI, progression, real-time networking, and mobile performance, plus hands-on AR Foundation and Oculus Quest 2 work.

EXPERIENCE

Lead Game Developer - IntoTheVerse Inc.

Jan 2024 – Mar 2026

Remote contract, Web3 gaming startup • Delhi, India

- Led Intract Inferis, an on-chain rogue-like action RPG on Solana, from concept through a playable vertical slice before a company-wide pivot.
- Architected combat, enemy AI, and player progression as reusable frameworks, cutting feature.
- Integrated wallet auth, on-chain asset ownership, and automated rewards into the Unity client with blockchain engineers.
- Ran sprint planning and milestone delivery for a cross-functional team of 10 across design, art, and blockchain.

Unity Developer - Abhiwan Technology Pvt Ltd.

Aug 2022 – Dec 2023

Full-time, on-site • Delhi, India

- Shipped 4 client Unity projects spanning RPG, AR, VR (Oculus Quest 2), and WebRTC-based real-time applications.
- Built the initial Unity client for Intract Inferis, including Solana wallet auth and on-chain asset flows.
- Optimised mobile builds, raised average frame rate from 45 to 60 FPS on mid-tier Android devices.
- Upheld code quality through OOP-based architecture, Git workflows, and peer code review.

Unity Developer - Compact Gyan

Apr 2022 – Oct 2022

[Internship / part-time] • India

- Built an interactive EdTech learning app in Unity, delivering 3D lesson modules used by more than 100 students.

SELECTED PROJECTS

Sushi-Nads

Nov 2025 – Mar 2026

Overcooked-style cooking management game for Android and WebGL with social login, NFT minting, and on-chain sessions.

Unity 3D, C#, WebGL, Privy, Monad Testnet, REST APIs

Furi-Fighter

May 2024 – Sep 2024

Zooba-style multiplayer battle royale; built progression, matchmaking, and dedicated servers for real-time sync.

Unity, C#, PlayFab, Photon, Dedicated Servers

APT-Horse

Feb 2024 – Apr 2024

On-chain multiplayer racing with provably fair randomness, real-time simulation, and a player staking economy.

Unity, C#, Aptos Blockchain, Multiplayer, Web3

XR Projects

2021 – 2022

Cyber Strike VR (Beat Saber-style rhythm combat, saber physics, precision collision), Human Anatomy AR (interactive 3D anatomy with world-space labels), AR Portal (surface-scanned 360° doorways).

Unity 3D, C#, AR Foundation, Oculus VR

SKILLS

Core: Unity 3D, C#, OOP, Game Architecture, Git, Cinemachine, NavMesh, Timeline

Multiplayer: Photon, Mirror, PlayFab, Dedicated Servers, WebRTC, Real-time Networking

Platforms: Android, iOS, WebGL, PC, mobile performance optimisation

Web3: Solana, Aptos, Monad, wallet auth, NFT minting, on-chain assets, REST APIs

XR: AR Foundation, Oculus Quest 2

EDUCATION

B.Tech, Computer Science & Engineering

2019 – 2023

Jaypee University of Engineering and Technology
